Sujana Kabir

Arlington, Texas | 903-867-9137 | kabirsujana0@gmail.com | LinkedIn | Portfolio | Github

Education

University of Texas at Arlington — Arlington, TX
Bachelor of Science in Computer Science GPA: 3.9/4.00 — *Aug. 2022 – May 2026*
- Relevant Coursework: Artificial Intelligence, Machine Learning, Data Science, Computer Vision, Data Mining

Skills

Languages: Python, Java, C, C#, SQL, React, TypeScript
Machine Learning & AI: TensorFlow, PyTorch, scikit-learn, Computer Vision (YOLOv8, YOLOv11, CNNs), OCR (Tesseract), Pandas, NumPy, Feature Engineering, Data Preprocessing & Augmentation
Generative AI & LLMs: OpenAI, Gemini, Claude, Hugging Face, RAG, Prompt Engineering, Agentic AI (LangChain, LangGraph)
Cloud, APIs & Automation: AWS (Lambda, RDS), Docker, REST APIs, CI/CD, PostgreSQL, Kubernetes, Firebase

Experience

AI/ML Engineer Intern — September 2026 - October 2026
SwifTrade LLC (AI B2B E-Commerce) — *Irving, TX*
- Designed a production LLM support agent (Node.js, Anthropic) for a BigCommerce storefront, including deterministic code-level guardrails and JWT authentication that passed all 27 adversarial security tests.
- Engineered a Node.js catalog automation pipeline to parse 4,933 B2B listings, decoding vendor SKUs to identify duplicates and stage 2,026 clean products for live production.
- Acted as technical lead for 3 interns, directing project workflows and building the AI platform from 0 to 1 utilizing Python, React, and TypeScript.

Software Quality Engineer Intern — May 2025 - June 2026
Recaro Aircraft Seating — *Fort Worth, TX*
- Engineered Python-based Agentic AI workflows (LangChain, LangGraph) integrated with OCR pipelines (Hugging Face, Tesseract) to automate complex data analysis for First Article Inspections, reducing manual entry by 30%.
- Built computer vision models (YOLOv8, CNNs) end-to-end for AI-driven industrial automation, reducing product inspection cycle time by 50% through image augmentation and data-quality preprocessing
- Deployed a containerized full-stack defect tracker (React/Docker) with CI/CD pipelines and REST APIs, participating in agile SDLC and conducting cross-functional code reviews with the Quality team via Jira.

Research Assistant — January 2025 - May 2025
University of Texas at Arlington — *Arlington, TX*
- Contributed to an LLM-driven route planner (GPT-4o, REST APIs, PostgreSQL) that turns natural-language requests into multi-stop routes optimized against live map data.
- Migrated PostgreSQL to AWS RDS with connection pooling, restoring sub-second responses for 70+ participants.

Projects

Ad CTR Prediction Model | *Python, R, Pandas, NumPy, Streamlit* — April 2026
- Engineered an ad CTR prediction pipeline (Random Forest, Logistic Regression), applying one-hot encoding to 10K+ behavioral records to optimize real-time bidding.

Editorial IQ — NLP & Pattern Recognition | *Python, scikit-learn, Pandas, Streamlit* — November 2025
- Engineered an NLP pipeline (classification, summarization, entity extraction, semantic search) on 2,225 articles in Python/scikit-learn — 98% accuracy (+75 pts over baseline), shipped as a Streamlit demo projecting $76K/year in time savings.

FishBowl — Computer Vision Mobile App | *YOLOv8, CNN, React Native, Firebase* — May 2026
- Trained and benchmarked YOLOv8 vs. YOLOv11 with augmentation and noise-reduction filters, deploying to 200+ iOS/Android users with Firebase Auth and encrypted HTTPS for GDPR-compliant data handling.

Interviewly — AI Interview Platform · Live Demo | *Gemini, AWS Lambda, Django, DynamoDB* — May 2024
- Designed a generative AI platform integrating Google Gemini to analyze responses and deliver personalized feedback across 70+ job roles, architected on AWS Lambda and Django REST framework for low latency and high availability.
